Step 10:
Sew the finished flower onto the clip-ons using the bead netting technique. Thread the line through the **R10A** from the outer row from Step 2 with the line on the lower side. String 5x **R10A**. Leave out one **R10A** from the row and thread the line through the others. Connect the entire row in this fashion. Thread the line through 3x **R10A**. Create the next row. Once again, string 5x **R10A**. Connect the central **R10A** from the previous row. Complete the row. Thread the line through 3x **R10A** one more time. Now string 3x **R10A** and the central **R10A** from the previous row. Insert the clip-ons. Tighten the **R10A**. Create one more row of **R10A** by the basic fastening. Sew through it one more time to ensure the strength of the netting.

PRECIOSA Rocailles
331 19 001; 10/0; 11/0; 14/0

Preciosa Ornela introduces seed beads from the PRECIOSA Traditional Czech Beads™ brand.

TRADITIONAL CZECH BEADS

FLOWERS IN INTENSIVE COLORS

Echo *of summer* blossoms

PRECIOSA

Echo of summer blossoms

Preserve the fleeting beauty of summer flowers so that they never wilt. Their charm will beguile you over and over in the form of flowers made from PRECIOSA Rocailles in intensive colors. Use your imagination and combine different colored flowers according to your own ideas. You can use them to make happy earrings or an entire costume jewelry set. You can also use the flowers as decorations in your home.

Materials and tools:

PRECIOSA Rocailles (**R10A**)
331 19 001; 10/0;
16A86; yellow; 5 g

PRECIOSA Rocailles (**R10B**)
331 19 001; 10/0;
16A77; pink; 5 g

PRECIOSA Rocailles (**R11**)
331 19 001; 11/0;
37398; light pink; 5 g

PRECIOSA Rocailles (**R14**)
311 19 001; 14/0;
80010; transparent yellow; 5 g

PRECIOSA Pressed Beads (**PB**)

80010; 2x

a needle; a 0.15 mm line; earring clip-ons, 15 mm in diameter

Difficulty: ●●●○○

**Technique:** sewing, the peyote stitch, stringing, netting

Procedure:

Step 1:
Create a basic row of 24x **R10A** around the circumference of a **PB**. First string 12x **R10A** and move them to the middle of the line. Then string 1x **PB** and thread the line through all the **R10A** and the **PB** once again. Tighten the stringing well. String a new group of 12x **R10A** and thread the line through from the other side of the **PB** once again and tighten the stringing well. Thread the line through the 12 new **R10A** again and in conclusion thread the line through all 24x **R10A** again and tighten the entire stringing. In this way, you will have divided the **PB** into two notional hemispheres.

Step 2:
Continue working on one of the hemispheres of the **PB**. Sew the next two rows of **R10A** using the peyote stitch (the yellow dots). Place 1x **R10A** above each gap between the **R10A** from the previous row; a total of 24 in each row.
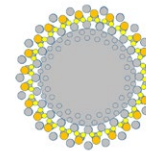

Step 3:
Use the peyote stitch to add two rows of **R14** (the small yellow dots) to the rows of **R10A** around the circumference of the **PB** on the same hemisphere. Once again, place 1x **R14** above each gap between the **R10A**; a total of 24 in each row.

Step 4:
Sew the second hemisphere of the **PB**. Return to the initial row of **R10** from Step 1. Continue as in Step 2 and sew on two rows of **R10**. Continue as in Step 3 and sew on two rows of **R14**.

Step 5:
String 1x **R14**, 1x **R10A** and 1x **R14** (the yellow dots) above each gap between the **R10A** in the last row and before the row of **R14**. Continue in the same way around the entire circumference. A total of 24x **R10A** and 48x **R14**.

Step 6:
Gradually string the layers of the petals to the rows of **R10A** around the **PB**. Create the first petal. String 6x **R10B**, 1x **R11** and then thread back through the last **R10B**. Then string 4x **R10B** and thread back through the lower **R10B**. Repeat this procedure 12x to create the entire first layer of petals.

Step 7:
Start attaching the second layer of petals to the next row of **R10A** around the **PB**. String 7x **R10B** and 2x **R11**. Thread the line back through the second **R11**. String 6x **R10B**. Thread the line back through the lower **R10B**. Once again, repeat this 12x and create the entire second layer of petals.

Step 8:
Start attaching the third layer of petals to the next row of **R10A** around the **PB**. String 8x **R10B** and 3x **R11**. Thread the line back through the second **R11** and string 1x **R11**. String 7x **R10B**. thread the line back through the lower **R10B**. Repeat this procedure 12x.

Step 9:
Start attaching the fourth layer of petals to the next basic row of **R10A** around the **PB**. String 9x **R10B** and 3x **R11**. Thread the line back through the second **R11** and string 1x **R11**. String 8x **R10B**. Thread the line back through the lower **R10B**. Repeat this procedure 12x and then the petals will be complete.
