LINKED NECKLACE ON A CHAIN WITH PRECIOSA TUBES

# Night Sky

PRECIOSA

# Night Sky

If you enjoy using the eye-pin linking technique, this project has something for you.  
It uses the bigger and stronger PRECIOSA Tubes with a larger hole.  
These seed beads come in three sizes: 40 x 3 mm, 50 x 3 mm and 60 x 3 mm.

## Procedure:

### The necklace

Step 1:  
Put a T4 on an eye pin. You will need about  
8 to 10 mm of wire to twist it around  
the end of the point, depending on  
the length of the pin. You can snip off any  
excess wire as needed. Grasp the edge  
of the protruding wire between the points  
of the needle-nosed pliers. Twist it around  
the points. This will create an eye.  
Gently bend the eye back around the edge  
of the T4 so that it is centrally positioned  
above the hole of the T4.

Step 2:  
Do the same with all T4.

Step 3:  
Do the same with all T5.

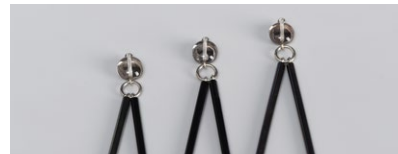

Step 4:  
Do the same with all T6.

Step 5:  
Put all the PB on an eye pin. The eyes  
should be twisted at 90° in relation to one  
another (one eye flat, i.e. in line with the  
PB, and the other vertical)

Step 6:  
Connect the T and the PB using an 8mm  
ring. String 2x T of the same length and  
the vertical eye of the PB. Connect 6x T4,  
6x T5 and 6x T6.

Step 7:  
Connect the created pendants  
to the chain using the 5mm rings.  
Snip off any unnecessary length of the chain  
(the example uses 54 cm). Find the central  
link. Hang a T6 pendant from it.  
Hang another pendant from every fifth link.  
Hang the T5, T4, T6, T5, T4, T6, T5 and T4  
in a mirrored sequence on both sides.

Step 8:  
Attach the carabiner and counterpart  
to the end links.
